

Welcome to the Future of Research

Real-time
Interactive
Data privacy under Owner's control
Securely share clinical trial data
Analytics API
Security infused architecture
Alerts

Allows for infinite "What ifs?"
Surpasses HIPAA and ISO 27001
Longitudinal Analysis
Not limited to specific industry
Worldwide network
Interact with data populations
Virtual clinical studies

Powerful Advantages

Infomediary™ Service

Interact with CorrStat Members to gain additional insights
Send criteria based real-time requests to data populations
Get a study populations instantly

Flexibility

Built-in functions provide multiple analysis options
Build or custom design analysis algorithms to gain further insights
Correlation studies include up to tertiary populations

Tools

Real-time data populations alerts on specified events or triggers
Create new CorrStat data identities in real-time
API allows third-party app development

ClinicalShare™ Program

Upload clinical patient data to CorrStat
Extend research reach
Sharing is rewarding

CorrStat™
